

EVEREST

SPUNTA x MARADONNA

Characteristics

Maturity	8
Foliage development	8
Dormancy	7
Colour of skin	LG
Colour of flesh	LG
Yield	9
Shape uniformity	8
Size of tubers	8
Shape of tubers	O
Shallowness of eyes	6
Cooking type	AB
% D.M.	17,8
Harvest damage	6
Black spot	6
Discol. after cooking	7
French fries index	6
Crisps index	5

Resistant to/tolerant

PCN Ro 1	very resistant
PCN Pa 2+3	susceptible
Leaf blight	5
Tuber blight	6
Early blight	7
Common scab	5
Wart disease race 1	susceptible
PVY (leaf resis.) mod.	susceptible

Crop protection

Metribuzin	mod. susceptible
Basagran	less susceptible
CIPC	susceptible

Comments

EVEREST is suitable for growing under harsh conditions (drought, heat). It shows quick emergence and development, resulting in dense foliage. It gives regular tubers with a high yield and requires low fertilisation. Tubers need to be set well before harvesting. This variety is very resistant to drought and secondary growth.

Table

EVEREST is an extremely high yielding table potato variety with large tubers. It has light yellow flesh with pale yellow skin. An early variety which shows very good results worldwide.
